TERMS OF ACCEPTANCE - INFORMED CONSENT FOR CARE

When a patient seeks chiropractic health care and we accept a patient for such care, it is essential for both to be working towards the same objective.

Chiropractic has only one goal. It is important that each patient understand both the objective and the method that will be used to attain it. This will prevent any confusion or disappointment.

Adjustment: An adjustment is for the specific application of forces to facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments of the spine.

Health: A state of optimal physical, mental and social well being, not merely the absence of disease or infirmity.

Vertebral Subluxation: A misalignment of one or more of the 24 vertebra in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in a lessening of the body's innate ability to express its maximum health potential.

Results: The purpose of chiropractic services is to promote health through the release of maximum nerve energy. Since there are so many variables, it is difficult to predict the time schedule and efficiency of chiropractic procedures. Sometime, the results are phenomenal. In some cases, there is a more gradual response; occasionally, the results are mediocre, or dismal. Many people find results with chiropractic care, in turn we must admit that conditions which do not respond chiropractically may come under the control of medical sciences. We will do our very best in determining that you need chiropractic care; however, we cannot be held responsible for a medical diagnosis, or under Wisconsin trial law be responsible for a medical referral.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxations. However, if during the course of a chiropractic spinal examination, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you see the services of a health care provider who specializes in that area.

Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. OUR ONLY PRACTICE OBJECTIVE is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjusting to correct vertebral subluxation.

I \_\_\_\_\_ have read and fully understand the above statements. All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction.
